

Central Wasatch Commission

The CWC Releases the
Environmental Dashboard

You may access the Environmental Dashboard at this link:

<https://cwc.utah.gov/environmental-dashboard/>

The Environmental Dashboard is a tool for the public, land managers, policymakers

and technical users to learn about the historic and current environmental conditions of the Central Wasatch. The Dashboard contains five environmental elements: air quality and climate, geology and soil, vegetation communities, water, and wildlife, and existing data for each element has been gathered and presented for public access. The boundaries for this environmental dashboard project are based on naturally occurring hydrologic units (or drainage areas) and are independent of the Central Wasatch Commission's jurisdictional boundary.
